## LINKING ETS & INTERNATIONAL COOPERATION

Saturday December 5<sup>th</sup> 16:30 – 18:00

EU Pavilion, Room Luxembourg, Hall 2, Blue Zone, Le Bourget-Paris

This event, co-hosted by ICAP and IETA, explores how an effective international climate framework could achieve a greater mitigation outcome than the mere sum of the individual Parties' contributions. Discussion highlights why “transfers” of emission reduction units and linkage of international climate policies must be featured in a future international climate framework – one that effectively enables jurisdictions to achieve the greatest mitigation outcome at the lowest possible cost.

This special event consists of a panel discussion bringing together policymakers, private sector participants, and academic representatives, followed by Q&A with the audience.

### AGENDA
