

Ukraine

General Information

<p>Summary</p>	<p>Status: ETS under development</p> <p>Jurisdictions: Ukraine</p> <p>Ukraine plans to establish a national ETS in line with its obligations under the ‘Ukraine-EU Association Agreement,’ which entered into force on 1 September 2017. Climate change related issues are addressed in Article 365 (c) Title V and Annex XXX to the agreement, which outlines steps for national ETS implementation, including:</p> <ul style="list-style-type: none"> · adopting national legislation and designating competent authority(ies); · establishing a system for identifying relevant installations and identifying GHGs; · developing a national allocation plan to distribute allowances; · establishing a system for issuing GHG emissions permits and allowances to be traded domestically among installations in Ukraine; and · establishing MRV and enforcement systems, as well as public consultations procedures. <p>Ukraine is working on its ETS plans with the assistance of the PMR and the German Development Agency (GIZ).</p>												
<p>Year in Review</p>	<p>The country has developed the main elements of the national MRV system to provide a solid basis for the upcoming ETS. In the third quarter of 2018, the Cabinet of Ministers approved a framework law on MRV, which was adopted by Parliament in December 2019. Secondary legislation has also been drafted to establish the MRV system. The MRV law will enter into force in spring 2020 and will be applied starting on 1 January 2021. To establish the ETS, Ukraine plans to develop separate legislation based on at least three years of data from the MRV system.</p> <p>In 2019, the Ministry of Ecology and Natural Resources of Ukraine was merged with the Ministry of Energy and Coal Mining to form the new Ministry of Energy and Environment Protection. The objective was to achieve better coherence between environmental and energy policies.</p>												
<p>Overall GHG emissions (excluding LULUCF)</p>	<p>Emissions: 320.6 MtCO₂e (2017)</p>												
<p>Overall GHG emissions by sector</p>	<table border="1"> <thead> <tr> <th>Sector Name</th> <th>MtCO₂e</th> </tr> </thead> <tbody> <tr> <td>Energy</td> <td>182.8</td> </tr> <tr> <td>Transport</td> <td>34.9</td> </tr> <tr> <td>Industrial Processes, solvent and other product use</td> <td>51.8</td> </tr> <tr> <td>Agriculture</td> <td>38.9</td> </tr> <tr> <td>Waste</td> <td>12.2</td> </tr> </tbody> </table>	Sector Name	MtCO ₂ e	Energy	182.8	Transport	34.9	Industrial Processes, solvent and other product use	51.8	Agriculture	38.9	Waste	12.2
Sector Name	MtCO ₂ e												
Energy	182.8												
Transport	34.9												
Industrial Processes, solvent and other product use	51.8												
Agriculture	38.9												
Waste	12.2												
<p>Overall GHG reduction target</p>	<p>BY 2020: 20% voluntary reduction from 1990 GHG levels (‘Copenhagen Accord’)</p>												

	<p>BY 2030: GHG emissions will not exceed 60% of 1990 GHG levels, including LULUCF ('NDC Submission')</p> <p>BY 2035: 20% GHG emissions reduction from final energy consumption from 2010 levels ('Energy Strategy 2035')</p> <p>BY 2050: GHG emissions from energy and industrial processes will not exceed 31%-34% of 1990 GHG levels (aspirational target of the 'Low Emission Development Strategy 2050')</p>

Developed and designed by [Lucid.Berlin](#)

In line with ICAP's mandate, the ICAP ETS map exclusively covers cap-and-trade systems for greenhouse gas emissions. Information displayed on the map is regularly updated by ICAP Secretariat staff based on official and public information as far as possible and subject to annual peer review by government representatives from the covered systems. Although the information contained in the map is assembled with utmost care, ICAP cannot be held liable for the timeliness, correctness and completeness of the information provided.
