

## Ukraine

### General Information

Summary	<p><b>Status:</b> ETS implementation scheduled</p> <p><b>Jurisdictions:</b> Ukraine</p> <p>Ukraine plans to establish a national ETS in line with its obligations under the Ukraine-EU Association Agreement, which entered into force on 1 September 2017. Climate change-related issues are addressed in Article 365 (c) Title V and Annex XXX to the Agreement. The country has to prepare for ETS implementation, including:</p> <ul style="list-style-type: none"> <li>· Adopt national legislation and designate competent authority/ies;</li> <li>· Establish a system for identifying relevant installations and for identifying greenhouse gases (Annexes I and II);</li> <li>· Develop a national allocation plan to distribute allowances to installations (art. 9);</li> <li>· Establish a system for issuing greenhouse gas emission permits and issue allowances to be traded domestically among installations in Ukraine (art. 4 and 11 - 13);</li> <li>· Establish monitoring, reporting, verification and enforcement systems and public consultations procedures (art. 9, 14 – 17, 19 and 21).</li> </ul> <p>The country is developing the main elements of the national MRV system to provide a solid basis for the upcoming ETS. In June 2018 the Ministry of Ecology and Natural Resources of Ukraine published the draft law on MRV of greenhouse gas (GHG) emissions (<a href="#">Ukrainian</a>). It was submitted to the Cabinet of Ministers for approval.</p> <p>Separate legislation is being drafted to establish the MRV system, transpose the relevant EU Directives, regulate GHG emissions and establish the ETS.</p> <p>Ukraine is working on its MRV plans and the plans for ETS development under the Ukraine-EU Association Agreement with the assistance of the PMR, the European Bank for Reconstruction and Development (EBRD), the United States Agency for International Development (USAID), the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) and other institutions.</p> <p><a href="#">Ministry of Ecology and Natural Resources of Ukraine</a> (Ukrainian) <a href="#">Activities of Ukraine under the Partnership for Market Readiness (PMR)</a></p>										
Overall GHG emissions (excluding LULUCF)	<b>Emissions:</b> 338.6 MtCO <sub>2</sub> e (2016)										
Overall GHG emissions by sector	<table border="1"> <thead> <tr> <th>Sector Name</th> <th>MtCO<sub>2</sub>e</th> </tr> </thead> <tbody> <tr> <td>Energy (excl. transport)</td> <td>193.59</td> </tr> <tr> <td>Transport</td> <td>32.21</td> </tr> <tr> <td>Industrial Processes, solvent and other product use</td> <td>58.0</td> </tr> <tr> <td>Agriculture</td> <td>42.4</td> </tr> </tbody> </table>	Sector Name	MtCO <sub>2</sub> e	Energy (excl. transport)	193.59	Transport	32.21	Industrial Processes, solvent and other product use	58.0	Agriculture	42.4
Sector Name	MtCO <sub>2</sub> e										
Energy (excl. transport)	193.59										
Transport	32.21										
Industrial Processes, solvent and other product use	58.0										
Agriculture	42.4										

	Sector Name	MtCO <sub>2</sub> e
	Waste	12.4
Overall GHG reduction target	<p><b>By 2020:</b> Voluntary target of 20% reduction from 1990 GHG levels (Copenhagen Accord).</p> <p><b>By 2030:</b> GHG emissions will not exceed 60% of 1990 GHG levels (NDC).</p> <p><b>By 2035:</b> Domestic target to reduce GHG emissions from final energy consumption by 20% from 2010 levels (Energy Strategy 2035).</p> <p><b>By 2050:</b> GHG emissions will not exceed 31-34% of 1990 GHG levels (Low-emission development strategy 2050).</p>	
Type of ETS	No information available yet.	
Cap and trajectory	No information available yet.	
Carbon Price	<i>Current Allowance Price (per t/CO<sub>2</sub>e):</i> No information available yet.	

### ETS Size

Emissions covered by the ETS	No information available yet.
GHG covered	No information available yet.
Sectors covered and thresholds	No information available yet.
Number of liable entities	No information available yet.
Point of regulation	No information available yet.

### Phases & Allocation

Compliance period	No information available yet.
Trading period	No information available yet.
Allocation	No information available yet.

### Flexibility

Banking and borrowing	No information available yet.
Offsets and credits	No information available yet.
Provisions for price management	No information available yet.

### Compliance

Monitoring, Reporting, Verification (MRV)	No information available yet.
Enforcement	No information available yet.

## Other Information

---

Institutions involved	Ministry of Ecology and Natural Resources Cabinet of Ministers of Ukraine
Linkage with other schemes	No information available yet.

Developed and designed by [Lucid.Berlin](#)

In line with ICAP's mandate, the ICAP ETS map exclusively covers cap-and-trade systems for greenhouse gas emissions. Information displayed on the map is regularly updated by ICAP Secretariat staff based on official and public information as far as possible and subject to annual peer review by government representatives from the covered systems. Although the information contained in the map is assembled with utmost care, ICAP cannot be held liable for the timeliness, correctness and completeness of the information provided.
