

## Canada - Manitoba (WCI)

### General Information

---

#### ETS Description

Manitoba Premier Greg Selinger announced an ETS as part of a new climate change plan on 3 December 2015 during the COP 21 in Paris. The system will be designed to link with other systems in North America; further details will be announced after public consultations. Manitoba participated in the Western Climate Initiative (WCI), a group of US states and Canadian provinces working to develop a regional approach to reduce their greenhouse gas emissions. The WCI set a collective emissions reduction target of 15% compared to 2005 levels by 2020 to be met through a cap and trade program. Currently, British Columbia, California, Manitoba, Ontario and Québec are members working to implement a joint strategy to reduce greenhouse gas emissions.

### Emissions & Targets

---

#### GHG reduction targets

Manitoba has achieved its initial target of stabilizing emissions in 2010 at 2000 levels. Although, targeted reductions for 2012 were not achieved due to population and economic growth, a suite of new policies and programmes have been announced in the 2015 action plan.

**By 2030:** reduce emissions by a third from 2005 GHG levels.

**By 2050:** reduce emissions by 50% from 2050 GHG levels.

**By 2080:** reach carbon neutrality.
