

Intern at the International Carbon Action Partnership (ICAP)

(m/w/d) Full time - Berlin

Job Summary

Founded in 2007, the International Carbon Action Partnership (ICAP) brings together policymakers from all levels of government that are operating an emissions trading system (ETS) or are taking steps to introduce one. ICAP provides a unique platform for governments to share their practical experiences of emissions trading and the latest ETS knowledge. The ICAP membership currently counts 33 members and 8 observers.

ICAP is now welcoming students to apply for our 2024 internship program. We are offering internship positions at the ICAP Secretariat in Berlin for a duration of three to six months.

Your tasks:

- research and coordination in support of ICAP's technical dialogue and knowledge sharing work, contributing to such publications as the annual flagship report "Emissions Trading Worldwide: The ICAP Status Report", various studies on ETS design and implementation, and analytical tools such as the ICAP Allowance Price Explorer
- support in preparing and conducting ICAP's capacity-building activities, such as workshops and training,
- policy analysis and evaluation of political processes concerning carbon pricing mechanisms,
- support in organizing and conducting ICAP events, and governance processes within ICAP.

Your qualifications:

- you are a bachelor student (with a minimum of five successfully completed semesters) or a master's student based in Germany, specializing in economics, environmental management, public policy, international relations, or a related field;
- you have an excellent academic track record;
- you have previous experience in the climate policy field, ideally with knowledge of carbon pricing mechanisms;
- you demonstrate excellent written and verbal communication skills;
- you have excellent command of English; further languages (e.g., German, Spanish, French, or Chinese) are a plus;

We offer:

- ICAP spirit: A dynamic and international team, working together in a supportive environment to make an impact on the issues we are passionate about.
- First-hand experience in the day-to-day work of an international organization.
- Insights into international and national policymaking processes.
- The opportunity to build expertise in a range of carbon market and carbon pricing topics.
- A chance to develop your skills and competencies in research, analysis, communication, and organization.

Candidates are welcome to submit their application as soon as possible (including CV, motivation letter indicating your availability, and degree transcripts) to internship@icapcarbonaction.com. Applications will be evaluated on a rolling basis.

The internship is carried out at the ICAP office in Berlin for a period of three to six months and should preferably be mandatory as part of the applicant's degree. Applicants should be enrolled as students in Germany during the internship or be conducting a professional year as part of their course requirements. German students or EU nationals studying in an EU country are also welcome to apply. Interns receive a monthly remuneration.
